Ecolane Mobile Data Terminal (MDT)

With real-time information updates to drivers including same-day schedule changes due to trip cancellations, no-shows, or traffic congestion, the result is maximized efficiency and productivity in an agency's use of their fleet. Dispatchers are able to work more effectively, respond to customers more efficiently, track vehicle locations in real-time and communicate directly with their drivers, all through the MDT.

MDT Highlights:

- Two-way data communication in real-time
- Instant tracking of vehicle locations
- Monitor and record location, including driving speeds
- Fast and efficient dispatching in real-time
- Increased safety and customer service
- Automated data collection
- Records time and location of all no-shows
- Simple installation and transferrable between vehicles
- Intuitive touch screen interface
- Vehicle inspections
