Hours of Operation

Future Needs – Buses

MRVT currently owns nine vehicles with a vehicle class of 400. The oldest of these vehicles (contract year of 2002 and the only diesel-powered vehicle in the fleet) is used as a spare or back-up vehicle. All vehicles have surveillance cameras installed, but none of the vehicles have Automatic Vehicle Location (AVL) or bike-racks. MRVT plans on replacing 1 vehicle every year between 2018-2025. Only two of their nine vehicles are in excellent condition.

Future Needs - Operations

The demographic and economic characteristics of the MRVT service area illustrates a need for transit that focuses on connections to economic opportunity and serving the disabled. MRVT experiences a capacity shortage during the mornings for service in St. Peter. MRVT (Le Sueur specifically) is short drivers and is looking to hire one driver full time.

Future Needs – Facilities

MRVT has a need for capital facilities, such as a joint facility for St. Peter and Le Sueur.

Future Needs – Technology

MRVT's website needs to be updated and has identified a need to add a marketing specialist.
