BUS BARRIERS

RECENT INITIATIVES/ BUS BARRIERS

MVTA is installing **custom bus barriers** to keep operators and customers safer by blocking operator compartment.

These are permanent barriers designed for each bus type to replace temporary plastic sheet barriers.

MVTA worked with a local company, Visual Impact, to design a low-cost custom design using clear polycarbonate. Barriers cost between \$515-\$700 per bus. By comparison, similar barriers from factory cost \$5,000 per bus.

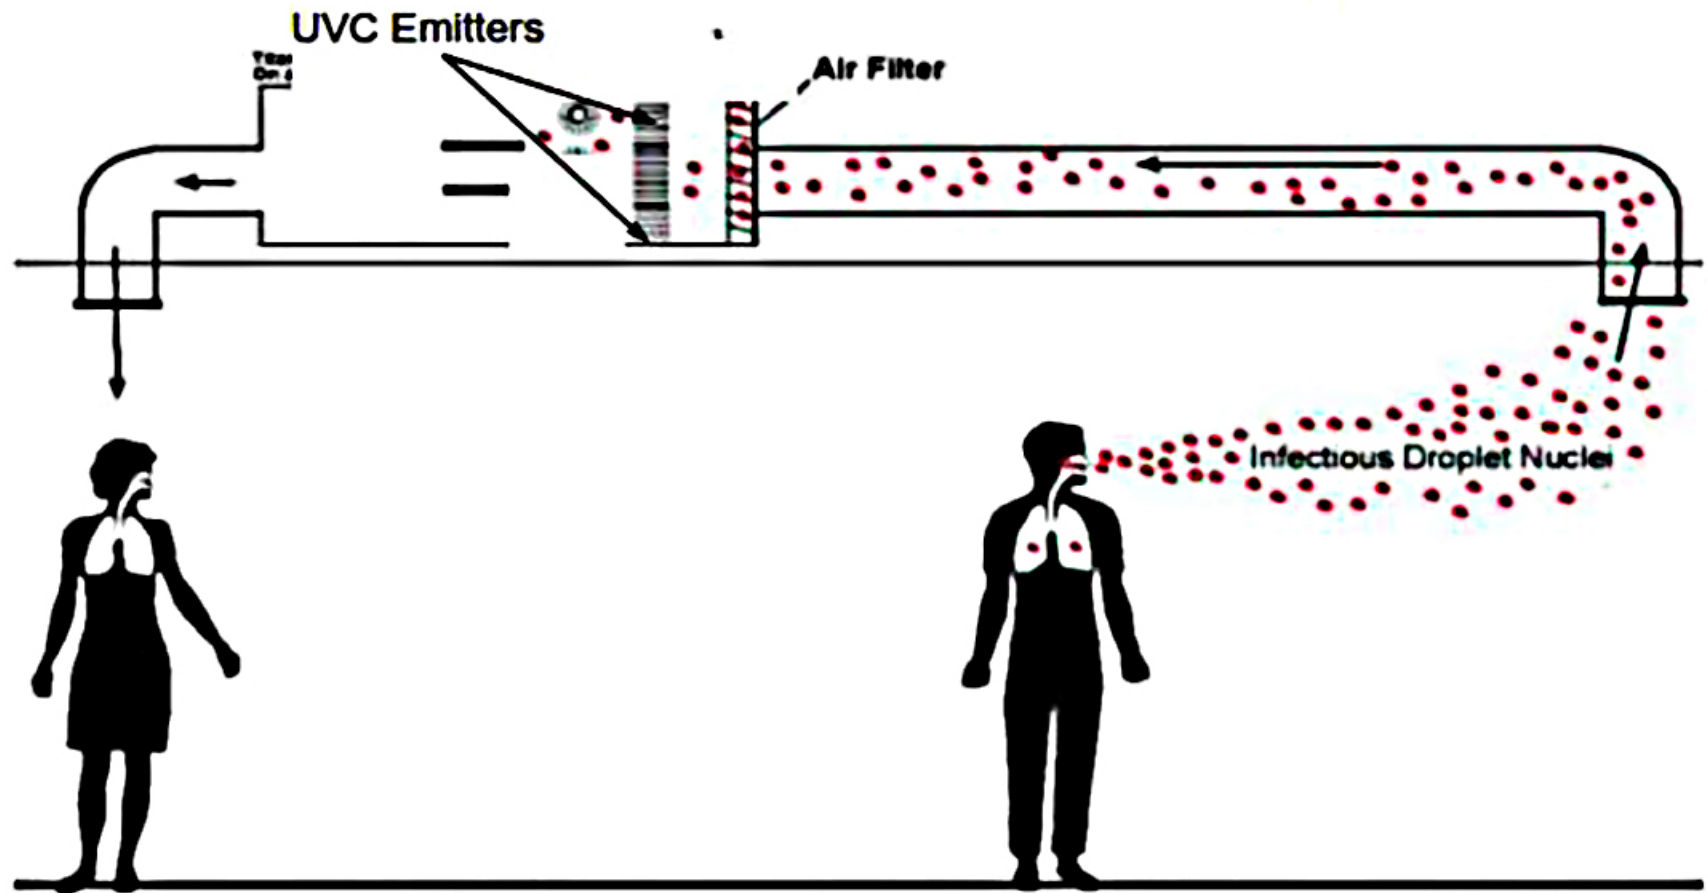

RECENT INITIATIVES/ UVGI LIGHTING

MVTA will be installing ultraviolet germicidal irradiation emitters at HVAC filters in three facilities (BBG, BTS, and EBG) for customer and employee safety.

UVGI uses short-wavelength ultraviolet light to kill or inactivate microorganisms and pathogens in the air.

The cost is under \$42,000 for three facilities.
